

## ADVANTAGES

- Temperature: Maximum continuous operating temperature of 250F (121C)
- The base ASME AG-1 Absolute E filter meets all applicable requirements as published under in the following documents; ASME AG-1, NQA-1, N509, and UL 586.
- ASME AG-1 Sizes 5, 7 and 9
- Minimum efficiency of 99.97% @ 0.3-microns
- Qualified filter media: Micro-glass fiber / acrylic resin binder qualified in accordance with ASME AG-1 Section FC-1

|                  |                                                                                     |
|------------------|-------------------------------------------------------------------------------------|
| <b>Frame</b>     | Stainless steel                                                                     |
| <b>Media</b>     | Glass fiber                                                                         |
| <b>Separator</b> | Aluminium                                                                           |
| <b>Sealant</b>   | Polyurethane                                                                        |
| <b>Comment</b>   | Note: The overall completed nipple connection filter is not qualified to ASME AG-1. |
